

DRIVING SURFACE PERFECTION™

ROCKET

TECHNICAL DATA SHEET

Version: 1.0

Paint Accelerator

DESCRIPTION

Liquid additive for use with 2K isocyanate hardeners to achieve rapid through-cure. Accelerates through curing of 2K primers, topcoats and clear lacquers significantly reducing stoving times. Offers increased workshop throughput and energy savings.

- Reduces drying time by between 30-50%
- Speeds up demasking and overpainting when mixed with 2K hardeners
- Compatible with most 2K coatings

Typical Use - PAINT ROCKET is an additive which is used in small quantities with 2K isocyanate hardeners to achieve rapid through curing.

Technical Data

Appearance	clear liquid
Mixing Ratio	as per directions below
Specific Gravity	0.88 g/cm ³

APPLICATION GUIDE

- **Important** - PAINT ROCKET is designed for use with conventional isocyanate hardeners and should not be used with non isocyanate hardeners or 2K air drying hardener "fast", winter or polar hardeners. It should not be mixed into hardeners to be used with S2021 High Build Primer. Users should exercise caution in using this product as RFU product VOC may be outside 2007 legislation limits. We recommend that this product should only be used in primer systems.

Application

- **Mixing Ratio** - Open a fresh can of 2K isocyanate hardener, remove the seal and add PAINT ROCKET as follows:-
Add between 2 and 3 reservoirs of PAINT ROCKET to 1 litre of hardener:
2K conventional hardeners: add two reservoirs per litre.
MS hardeners: add 3 reservoirs per litre.
Replace the lid tightly and shake well to mix the 2K hardener and PAINT ROCKET thoroughly together in the can.
Mark the can so that PAINT ROCKET is not added a second time.
The accelerated 2K hardener can now be used in the normal way with 2K primers, colours or clear lacquers.
The addition of PAINT ROCKET at 2-3% will reduce drying time by between 30-50% depending on the paint product with which it is mixed.
